New Business Announcement

Cascade Die Casting Group secures over \$3.3M of new business in the December and January.

New contracts were established with several companies during the past 60 days as follows;

- A market leader in the front end accessory drive industry has contracted with Cascade to provide two castings for an upcoming 4 cylinder program with a leading OEM manufacturer. This is a new customer for Cascade and furthers our business efforts in the Automotive Power Train product line.
- A market leader in the development and production of convertible roof systems has awarded two castings to Cascade; a large, complex casting that requires Class A finish and a smaller assembly system. The castings will be run on a 1200T machine and 900T machine, respectively, with finishing being done in conjunction with a strategic supplier to Cascade.
- One of the industry's largest manufacturer's of mirror systems has placed new business with Cascade which will launch in the fall of CY2010. The OEM customer represents a new market for Cascade and furthers their relationship with the Tier 1 supplier.
- Another major player in the mirror systems market has inked a contract with Cascade to supply components for both a right hand and left hand drive vehicle that will launch in early CY2011.

Cascade Die Casting Group is a market leader in the production of both aluminum and zinc castings – both functional and Class A, with full TS accreditation at all locations.
